**DAVIS & ASSOCIATES, LLC INCORPORATES CRYPTOBBOX FILE SECURITY SOLUTION**  
**D&A'S HOLISTIC IG SERVICE PICKS CRYPTOBBOX AS ITS SECURITY STANDARD**

NY, New York: Davis & Associates (D&A), a leading provider of integrated technology solutions and information governance services for law firms, corporate legal and IT departments is pleased to announce that Ercom and D&A have formed a partnership to leverage Ercom Cryptobox's secured file sharing solution as a part of D&A's Holistic Information Governance as a Service (HiGaaS) offering. Cryptobox's data segregation mechanism and blockchain enabled chain of custody ledgers is a disruptive paradigm which provides unimpeachable security, authentication, auditing and chain of custody for data under its management.

"Our corporate and law firm clients can put file storage security concerns to rest given that we are using Cryptobox's secure encryption framework to facilitate file transfer, collaboration and archival," said founding Partner Rich Davis.

"We are very proud to enable D&A to offer an even more secure and auditable solution, thanks to our unique product that combines data segregation and a forensic chain of custody. It is ideal for any team that needs to share highly confidential data inside and outside their environments while keeping a tamper-proof activity audit log," said Julia Mason, Director, Ercom USA.

"I've been advising CIO's and Managing Partners of law firms for years on technology and nothing in the market compares to Cryptobox's security model. With Cryptobox, terabytes of data can be encrypted and securely stored in commercial cloud environments. No one, not even the cloud provider can access the data without the data owner's key," said D&A Director of Operations Larry Braggi.

Additional benefits of the D&A / Cryptobox partnership:

- M&A: Super secure deal rooms for contract analysis.
- Litigation: Cross jurisdictional staging and processing of sensitive data for discovery purposes.
- Record Management: Encrypted archival of intellectual property or sensitive materials.

About Davis & Associates: Davis & Associates is a provider of cloud based data hosting, classification and migration solutions. [www.davisinfogov.com](http://www.davisinfogov.com) or redavis@davisinfogov.com.
