

Ercom is strengthening its teams with the arrival of a Chief Operating Officer

Ercom announces the arrival of Patrick Plas as Chief Operating Officer to support future growth

Ercom is pleased to welcome Patrick Plas to its Executive Committee. In his role as Chief Operating Officer, Patrick will be responsible for the proper execution of the Company's strategic plan, and monitoring operational performance in all aspects, including product roadmaps, R&D, marketing and contract execution.

Patrick Plas began his career at France Telecom, where he participated, among other things, in the creation of the Romanian mobile network. He then joined Alcatel where he held various positions, in particular the operational management of large accounts such as SFR, various product line responsibilities, and the development of the mobile business for the Eastern Europe and Central Europe Region based in Moscow. Since 2015, Patrick worked at Alstom/General Electric as a Product Line Manager for power transmission technologies.

"I am delighted that Patrick is joining us to help accelerate Ercom's growth and address challenges, such as the launch of new solutions around detection of fraud and artificial intelligence", declared Yannick Dupuch, CEO of Ercom.
